Vision

Develop a web wiki where any fan of TV can look up for any known information about their favorite TV show or one they are interested in watching.

Motivation

When watching shows, viewers occasionally want to find specific information about the plot, characters, and settings of the show they're watching. By developing this Wiki, we will be able to create a central hub for people to find this information as well as other shows similar to the ones that they are interested in.

Goals

- The user can simply find a summary of a show or movie they are interested in.
- The user can find a new show they are interested in.
- The user can avoid being spoiled while researching info on what they are looking for.

Non-goals

- The user can't look for slang used by certain characters on specific shows and their meaning with context.
- The user can't debate on which characters they like or dislike and how their actions should have impacted the plot
- The user can't input and read the recommendation of others pertaining to a show they are interested in watching or have watched.
- The wiki is not an application to keep track of what shows you have watched and are watching.
- The wiki is not a social networking service.
-

Functional Requirements

1. View Pages - Once a page is created, a read-only view is available
 - a. Pages can link up to the other pages in the wiki by page name

- b. Contents space - Where the user can navigate to a specific part of the page by clicking a link.
 - c. Sources of information
- 2. Edit Pages - Page in the wiki can be edited by any user.
 - a. The user is able to edit the page by pressing the “edit” option on a top menu that also has the “read” option.
 - b. Preview - Show a preview of how the change will be looking on the page.
- 3. Page History - Any user can see a summary of all changes that have been made on a single page.
 - a. The user will be able to view the history by pressing the “history” option at the top menu.
 - b. The filtered by searching an specific change, data of change or name of the user who made it.
 - c. The history will include the name of the user who made the change.
 - d. The history will include a description of the change made.
 - e. The history will include the date and time the change was made.

Non-functional Requirements

- 1. Accessibility
 - a. The user is able to clearly read any information on a given page.
 - b. The user is able to clearly access the information from most devices.
 - c. The wiki should be easy to navigate.

Use Cases

William was browsing Netflix when he came across a show that he was curious about. He noticed the description was a bit vague, and decided to look for more information. William then opened a wiki page about the show, where he was able to learn about the setting, characters, and the plot. Viewing the cool environment and characters made him even more interested, which motivated William to binge-watch the show.
